

# OData Standards Support Errata

---

**This topic lists the Errata found in the OData Standards Support document since it was last published. Since this topic is updated frequently, we recommend that you subscribe to these RSS or Atom feeds to receive update notifications.**

**Errata are subject to the same terms as the Open Specifications documentation referenced.**

Errata are content issues in published versions of protocols documents that could impact an implementation. Examples of errata are errors or missing information in the normative sections of the Technical Specifications or in the use cases (examples) in the Technical Specifications and Overview Documents.

Content issues that don't impact an implementation, for example, editorial updates due to typos, formatting updates, and rewrites for readability and clarity, are not included in Errata.

## [MS-ODATAJSON]: OData Protocol JSON Format Standards Support Document

This topic lists the Errata found in the MS-ODATAJSON document since it was last published. Since this topic is updated frequently, we recommend that you subscribe to these RSS or Atom feeds to receive update notifications.

Errata are subject to the same terms as the Open Specifications documentation referenced.

No errata are available for the latest version of this OData Standards Support document. To view a PDF file of the errata for the previous version of this document, see the ERRATA May 10, 2016 Archive [here](#).
