

# SQL Server Protocols Errata

---

**This topic lists the errata found in the SQL Server Protocols technical specifications and overview document since they were last published. Because this topic is updated frequently, we recommend that you subscribe to the RSS or Atom feed to receive update notifications.**

**Errata are subject to the same terms as the Open Specifications documentation that are referenced.**

Errata are content issues in published versions of protocols documents that could impact an implementation. Examples of errata are errors or missing information in the normative sections of the technical specifications or in the use cases (examples) in the technical specifications and overview document.

Content issues that do not impact implementation—for example, editorial updates due to typos, formatting, and rewrites for readability and clarity—are not included in errata.

The next section lists the SQL Server technical documents that contain active errata (that is, errata not yet released with the documents in the [Open Specifications Library](#)). Links to previously published errata are available on the following pages and on the main page of each document, as applicable.

## SQL Server Protocols Documents with Active Errata

None.

## [MS-CPREST]: Control Plane REST API

**This topic lists the Errata found in the MS-CPREST document since it was last published. Since this topic is updated frequently, we recommend that you subscribe to these RSS or Atom feeds to receive update notifications.**

**Errata are subject to the same terms as the Open Specifications documentation referenced.**

No errata are available for the latest version of this SQL Server Protocols document. To view a PDF file of the errata for the previous versions of this document, see the following ERRATA Archives:

June 10, 2021 - [Download](#)

## [MS-DTSX]: Data Transformation Services Package XML File Format

This topic lists the Errata found in the MS-DTSX document since it was last published. Since this topic is updated frequently, we recommend that you subscribe to these RSS or Atom feeds to receive update notifications.

Errata are subject to the same terms as the Open Specifications documentation referenced.
