

[MS-TSQLISO03]:

SQL Server Transact-SQL ISO/IEC 9075-3 Standards Support Document

Intellectual Property Rights Notice for Open Specifications Documentation

- **Technical Documentation.** Microsoft publishes Open Specifications documentation (“this documentation”) for protocols, file formats, data portability, computer languages, and standards support. Additionally, overview documents cover inter-protocol relationships and interactions.
- **Copyrights.** This documentation is covered by Microsoft copyrights. Regardless of any other terms that are contained in the terms of use for the Microsoft website that hosts this documentation, you can make copies of it in order to develop implementations of the technologies that are described in this documentation and can distribute portions of it in your implementations that use these technologies or in your documentation as necessary to properly document the implementation. You can also distribute in your implementation, with or without modification, any schemas, IDLs, or code samples that are included in the documentation. This permission also applies to any documents that are referenced in the Open Specifications documentation.
- **No Trade Secrets.** Microsoft does not claim any trade secret rights in this documentation.
- **Patents.** Microsoft has patents that might cover your implementations of the technologies described in the Open Specifications documentation. Neither this notice nor Microsoft's delivery of this documentation grants any licenses under those patents or any other Microsoft patents. However, a given Open Specifications document might be covered by the Microsoft [Open Specifications Promise](#) or the [Microsoft Community Promise](#). If you would prefer a written license, or if the technologies described in this documentation are not covered by the Open Specifications Promise or Community Promise, as applicable, patent licenses are available by contacting iplg@microsoft.com.
- **License Programs.** To see all of the protocols in scope under a specific license program and the associated patents, visit the [Patent Map](#).
- **Trademarks.** The names of companies and products contained in this documentation might be covered by trademarks or similar intellectual property rights. This notice does not grant any licenses under those rights. For a list of Microsoft trademarks, visit www.microsoft.com/trademarks.
- **Fictitious Names.** The example companies, organizations, products, domain names, email addresses, logos, people, places, and events that are depicted in this documentation are fictitious. No association with any real company, organization, product, domain name, email address, logo, person, place, or event is intended or should be inferred.

Reservation of Rights. All other rights are reserved, and this notice does not grant any rights other than as specifically described above, whether by implication, estoppel, or otherwise.

Tools. The Open Specifications documentation does not require the use of Microsoft programming tools or programming environments in order for you to develop an implementation. If you have access to Microsoft programming tools and environments, you are free to take advantage of them. Certain Open Specifications documents are intended for use in conjunction with publicly available standards specifications and network programming art and, as such, assume that the reader either is familiar with the aforementioned material or has immediate access to it.

Support. For questions and support, please contact dochelp@microsoft.com.

Revision Summary

Date	Revision History	Revision Class	Comments
6/29/2012	1.0	New	Released new document.
7/16/2012	1.0	None	No changes to the meaning, language, or formatting of the technical content.
10/8/2012	1.0	None	No changes to the meaning, language, or formatting of the technical content.
10/23/2012	1.0	None	No changes to the meaning, language, or formatting of the technical content.
3/26/2013	1.0	None	No changes to the meaning, language, or formatting of the technical content.
6/11/2013	1.0	None	No changes to the meaning, language, or formatting of the technical content.
8/8/2013	1.0	None	No changes to the meaning, language, or formatting of the technical content.

1 Introduction

SQL Server Transact-SQL ISO/IEC 9075-3 Standards Support Document describes the level of support that is provided by Transact-SQL in both Microsoft SQL Server 2008 R2 and Microsoft SQL Server 2012 for Part 3: Call-Level Interface (SQL/CLI) of the 2008 version of the SQL language ISO/IEC 9075 international standard specification.

The **Transact-SQL** language is a procedural extension of the SQL database programming language as implemented by Microsoft [[MSDN-Transact-SQLRef](#)]. Transact-SQL supports and extends ANSI SQL. The Transact-SQL dialect is based on International Standard ISO/IEC 9075.

At the time of first release of [MS-TSQLISO03], ISO/IEC 9075-3:2008 was the most current version of Part 3.

1.1 Glossary

This document uses the following terms:

Transact-SQL: The Microsoft proprietary version of SQL, the structured query language.

MAY, SHOULD, MUST, SHOULD NOT, MUST NOT: These terms (in all caps) are used as defined in [[RFC2119](#)]. All statements of optional behavior use either MAY, SHOULD, or SHOULD NOT.

1.2 References

Links to a document in the Microsoft Open Specifications library point to the correct section in the most recently published version of the referenced document. However, because individual documents in the library are not updated at the same time, the section numbers in the documents may not match. You can confirm the correct section numbering by checking the [Errata](#).

1.2.1 Normative References

We conduct frequent surveys of the normative references to assure their continued availability. If you have any issue with finding a normative reference, please contact dochelp@microsoft.com. We will assist you in finding the relevant information.

[ISO/IEC9075-3:2008] ISO/IEC, "Information technology — Database languages — SQL — Part 3: Call-Level Interface (SQL/CLI)", ISO/IEC 9075-3:2008, July 2008, http://www.iso.org/iso/iso_catalogue/catalogue_tc/catalogue_detail.htm?csnumber=38641

Note There is a charge to download the specification.

1.3 Microsoft Implementations

SQL Server 2008 R2

SQL Server 2012

1.4 Standards Support Requirements

An SQL implementation that is fully compliant with the SQL standards implements all mandatory features and optionally implements any optional features. For Part 3 of the standards (International Standard ISO/IEC 9075), the normative variations from mandatory features are listed in [Mandatory Features \(section 2.1.1\)](#) and the normative variations from optional features are listed in [Optional Features \(section 2.1.2\)](#).

This document covers Transact-SQL alignment with normative statements in the ISO/IEC standard. This document does not include:

- Clarifications of ambiguity in the target specification.
- Intended points of variability in the target specification, such as the use of MAY, SHOULD, or RECOMMENDED.
- The use of extensibility points, such as optional implementation-specific data.

The following table lists the sections of [\[ISO/IEC9075-3:2008\]](#) that are considered normative and that are considered informative.

Section	Normative/Informative
1 - 3	Informative
4 - 10	Normative
Appendices A - I	Informative

1.5 Notation

The following notations are used to identify clarifications in the [Standards Support Statements \(section 2\)](#).

Notation	Explanation
C####	This notation identifies a clarification of ambiguity in the target specification. This includes imprecise statements, omitted information, discrepancies, and errata. This does not include data formatting clarifications.
V####	This notation identifies an intended point of variability in the target specification, such as the use of MAY, SHOULD, or RECOMMENDED. This does not include extensibility points.
E####	Because the use of extensibility points (such as optional implementation-specific data) could impair interoperability, this notation identifies such points in the target specification.

2 Standards Support Statements

2.1 Normative Variations

The following subsections detail the normative variations in **Transact-SQL** from [\[ISO/IEC9075-3:2008\]](#).

2.1.1 Mandatory Features

2.1.1.1 C011, All facilities defined by this part of ISO/IEC 9075

V0001:

The specification states the following:

```
Subclause 5.1, "<CLI routine>":

<CLI routine> ::=
  <CLI routine name> <CLI parameter list> [ <CLI returns clause> ]

<CLI routine name> ::=
  <CLI name prefix><CLI generic name>

<CLI name prefix> ::=
  <CLI by-reference prefix>
  | <CLI by-value prefix>

<CLI by-reference prefix> ::=
  SQLR

<CLI by-value prefix> ::=
  SQL

<CLI generic name> ::=
  AllocConnect
  | AllocEnv
  | AllocHandle
  | AllocStmt
  | BindCol
  | BindParameter
  | Cancel
  | CloseCursor
  | ColAttribute
  | ColumnPrivileges
  | Columns
  | Connect
  | CopyDesc
  | DataSources
  | DescribeCol
  | Disconnect
  | EndTran
  | Error
  | ExecDirect
  | Execute
  | Fetch
  | FetchScroll
  | ForeignKeys
  | FreeConnect
  | FreeEnv
  | FreeHandle
  | FreeStmt
  | GetConnectAttr
  | GetCursorName
```

```

| GetData
| GetDescField
| GetDescRec
| GetDiagField
| GetDiagRec
| GetEnvAttr
| GetFeatureInfo
| GetFunctions
| GetInfo
| GetLength
| GetParamData
| GetPosition
| GetSessionInfo
| GetStmtAttr
| GetSubString
| GetTypeInfo
| MoreResults
| NextResult
| NumResultCols
| ParamData
| Prepare
| PrimaryKeys
| PutData
| RowCount
| SetConnectAttr
| SetCursorName
| SetDescField
| SetDescRec
| SetEnvAttr
| SetStmtAttr
| SpecialColumns
| StartTran
| TablePrivileges
| Tables
| <implementation-defined CLI generic name>

<CLI parameter list> ::=
  <left paren> <CLI parameter declaration>
    [ { <comma> <CLI parameter declaration> }... ] <right paren>

<CLI parameter declaration> ::=
  <CLI parameter name> <CLI parameter mode> <CLI parameter data type>

<CLI parameter name> ::=
  !! See the individual CLI routine definitions

<CLI parameter mode> ::=
  IN
  | OUT
  | DEFIN
  | DEFOUT
  | DEF

<CLI parameter data type> ::=
  INTEGER
  | SMALLINT
  | ANY
  | CHARACTER <left paren> <length> <right paren>

<CLI returns clause> ::=
  RETURNS SMALLINT

<implementation-defined CLI generic name> ::=
  !! See the Syntax Rules

```

Microsoft SQL Server 2008 R2 and Microsoft SQL Server 2012 vary as follows:

Transact-SQL partially supports this feature. Transact-SQL supports feature C002, "CLI routine invocation in C", but does not support any other feature in the range C001 through C007.

2.1.2 Optional Features

The standard [\[ISO/IEC9075-3:2008\]](#) does not specify any optional features.

2.2 Clarifications

Unless otherwise specified, the specified product conforms to all SHOULD and RECOMMENDED behavior in [\[ISO/IEC9075-3:2008\]](#).

2.3 Error Handling

None.

2.4 Security

None.

3 Change Tracking

No table of changes is available. The document is either new or has had no changes since its last release.
